

Cyber Security Policy

The more we rely on technology to collect, store and manage information, the more vulnerable we become to security breaches. Human errors, hacker attacks and system malfunctions could cause great financial damage and may jeopardize our company's reputation.

Confidential data is secret and valuable. Common examples are:

- Unpublished financial information
- Data of customers/partners/vendors
- Patents, formulas or new technologies
- Customer lists (existing and prospective)

All employees are obliged to protect this data. In this policy, we will give our employees instructions on how to avoid security breaches.

F Brazil Reinforcements Ltd will review this policy with our IT subcontractor, Hometech Centre, Essex, in line with their and all FBR policies and amend the policy when needed to ensure continued compliance with regulations, new initiatives and best practice guides.
