

F Brazil Reinforcements Ltd
Greenhouse Gas & Energy Management Policy Statement

F Brazil Reinforcements Ltd (FBR) is committed to reducing its greenhouse gas emissions and to using energy in the most efficient, cost- effective and environmentally responsible manner possible. To meet this goal, FBR will commit to managing the following:

- To ensure that areas within the business such as travel, purchasing, waste and stakeholder management have a positive impact on our sustainability Greenhouse Gases (GHG) & energy management
- To identify all FBR sources of greenhouse gas emissions, and to set reduction targets for each and report on GHG reduction progress.

FBR will manage energy and greenhouse gases together through an integrated approach, and respond to climate change with both mitigation and adaptation strategies. This policy applies to all areas of FBR operations and infrastructure.

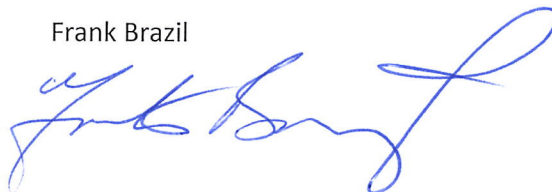

FBR has adopted a sustainability manual to provide guidelines within FBR to implement sustainability. More precisely, the sustainability manual states: "This sustainability manual in conjunction with our policy is intended to guide FBR practices toward sustainability. The strategy is to maximize sustainability by engaging and guiding all at FBR and relevant stakeholders in the development and the implementation of new projects, behaviours, and policies that will advance the sustainability agenda." Greenhouse gas and energy management is one of many areas of operation under the sustainability umbrella policy.

This greenhouse gas and energy management policy is one of the policies needed to maximize sustainability at FBR.
